

EMEP Report 3/2000

June 2000

**HEAVY METAL TRANSBOUNDARY
POLLUTION IN EUROPE:
MONITORING AND MODELLING RESULTS
FOR 1997 AND 1998**

Acknowledgements

A large number of anonymous co-workers in participating countries have been involved in this work. A list of participating institutes can be seen below. The staff at CCC wishes to express their gratitude and appreciation for continued good co-operation and efforts.

Denmark	National Environmental Research Institute
Czech Republic	Czech Hydrometeorological Institute
Estonia	Estonian Environmental Research Centre
Finland	Finnish Meteorological Institute
Germany	Umweltbundesamt
Iceland	The Icelandic Meteorological Office
Ireland	Environmental Protection Agency (EPA)
Latvia	Latvian Hydrometeorological Agency
Lithuania	Institute of Physics
Netherlands	National Institute for Public Health and Environmental Protection (RIVM)
Norway	Norwegian Institute for Air Research (NILU)
Poland	Institute of Environmental Protection
Portugal	Ministerio do Ambiente, Instituto de Meteorologia
Slovak Republic	Slovak Hydrometeorological Institute
Sweden	Swedish Water and Air Pollution Research Institute (IVL)
United Kingdom	AEA Technology

The authors express their thanks to the scientific staff of the MSC-East for valuable advises and preparation of necessary information. Priceless help was provided by scientists from GKSS, Germany (Prof. Gerhard Petersen, Prof. Ralf Ebinghaus and their colleagues), from IVL, Sweden (Dr. John Munthe and his colleagues) at the stage of operational model development. A considerable contribution to understanding the situation with heavy metal anthropogenic emissions in Europe was done by Prof. Jozef Pacyna. Ministry for Environment Protection of Germany (Dr. Dagmar Kallweit) and Agency for Hydrometeorology of Latvia (Mrs. Iraidia Lyulko) presented kindly detail information on lead and cadmium concentrations obtained at national levels. The authors appreciate to European Centre of Medium Range Weather Forecast for the data on surface roughness. An important information on natural mercury emission to the atmosphere was supplied by Italian scientists. The data on spatial distribution of ozone and sulphur dioxide concentrations prepared and kindly presented by scientists of MSC-West were used in the model calculations.

An inestimable role is of Mrs. Larissa Zayavlina, Ms. Irene Strizhkina, Ms. Olga Rozovskaya, and Mrs. Svetlana Yevdokimova who made the translation of the text and technical preparation of the report materials.
